

21-Circuit Distribution Box Specifications

Overview

The XL-21 type low-voltage power distribution cabinet is an indoor fixed enclosed complete set of equipment that complies with IEC 60439-1 and GB 7251. It is specially designed for 50Hz AC power distribution systems with a rated voltage of 380V/660V and a rated current of. The XL-21 power distribution box is widely used in power plants and industrial enterprises. The switchgear meet the requirements of standard IEC60439 etc. These boxes are essential for safely routing electricity in residential, commercial, and industrial environments, offering organized circuit protection through MCBs (Miniature. The XL-21 Power Distribution Box is used for power distribution, conversion, transmission, control, and on-site operations in low-voltage distribution systems. It is widely applied in power plants, substations, petroleum, chemical, metallurgy, machinery, and high-rise buildings. It serves as the central hub for receiving and distributing electrical energy in low-voltage systems up to 380V.
