

# 256-channel monitoring core switch

## Overview

Core 256 is a digital router and monitoring interface with 256 ch. Dante AoIP I/O, MADi 64 ch. summing and speaker EQ processing. Even though it is a tiny Dolby Atmos® hero, Core 256 is of course ready to take on a wealth of other tasks in the Post Production, Studio and Installed Audio spheres. With Dante, MADi and ADAT ports onboard and versatile and flexible DADman routing control available, it is also a stellar D/D. Core 256 may not take up much space, but the power you can squeeze out of this little box might just make your jaw drop to the floor. MADi SFP I/O module option and 16 ch. The Thunder|Core-driven Core 256. With tons of channels, a wide palette of digital connectivity, built-in SPQ processing, Eucon control compatibility, internal summing engine and drivers for macOS and Windows 10, it is a pristine digital audio interface by any measure and for just about any application. However, there is one. The Core 256 Audio Interface provides Thunderbolt 3, Dante, MADi and ADAT connectivity. This powerhouse enables an expansive I/O count of up to 256 channels of Dante Tx & Rx.
