

Application of SC Adapter

Overview

An SC adaptor, or Subscriber Connector adaptor, is a device used in fiber optic networks to connect fiber optic cables together or to devices like transceivers, optical receivers, and routers. SC adaptors are specifically designed to provide a reliable connection with minimal. Our range of high quality SC adaptors have high precision alignment sleeves for reliability and improved reconnectability. For single mode and multimode applications a ceramic sleeve is supplied. Characterized by a push-pull design, it boasts low insertion loss and high return loss, making it ideal for high-density fiber optic network. Corning's 728 series and 740 series of SC (subscriber connector) connectors and adapters offer superior performance with high repeatability. They utilize tightly. The SC Series by SANWA is the answer to current industry trends to meet the evolving needs of our customers.
