

Armenia's use of network server racks

Overview

Armenia's data center market, valued at \$8 million with 550 racks, is expected to grow to 1,000–2,000 racks by 2028, driven by digitalization and government support. Its location between Europe and the Middle East offers potential for international business. These servers are designed to maximize space and improve cooling efficiency. Armenia is an attractive data center. Mitsubishi and Systemair cooling systems maintain optimal temperatures across two machine rooms housing over 200 server racks, each supporting up to 5 kW capacity. This market specifically focuses on solutions that support significant computing power for businesses. From physical infrastructure deep inside a server room to AI-powered robotic process automation running at the application layer, Art-Group covers the entire IT stack and everything in between. What makes Art-Group LLC stand out from other vendors of corporate IT solutions?

Everything starts with. The Network Readiness Index (NRI) is one of the leading global indices on the application and impact of information and communication technology (ICT) in economies around the world.
