

Bundled fiber optic cable placement

Overview

Optical fiber binding tapes are used to bundle optical fibers. Before bundling optical fibers, read the instructions and precautions carefully to prevent man-made accidents. Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. The cable should be bent as little as possible. Turn-backs and all sharp changes of direction. During hardware installation, cut the corrugated pipe to the desired length and wrap adhesive tape around the sharp ends to protect the optical fiber. The charter of the FOA was to promote professionalism in fiber optics through education, certification, and. Innerduct provides a good way to identify fiber optic cable and protect it from damage, generally a result of someone cutting it by mistake! You can get the innerduct with pulling tape already installed. Create a detailed, written plan of installation. You can eliminate 95%. This guide will explain the entire set of activities involved in installing Fiber optic cable contractors -from the early planning stage right through testing-for facility managers, IT teams, and low-voltage contractors to build high-performance networks safely and efficiently.
