

Butterfly-shaped self-supporting drop fiber optic cable

Overview

FTTH Butterfly Optic Cables, also known as flat drop fiber cables, feature a compact flat profile with optical fibers placed at the center and reinforced by parallel strength members on both sides. The outer sheath is typically LSZH or PVC, optimized for indoor and outdoor. It is mainly used as a fiber to the home (FTTH) and other fiber optic access (FTTx) network user introduction segment cabling cable for communication between indoor user access points and optical network terminals (ONTs). It can be used for laying in indoor environments such as vertical shafts. Streamline Your Fiber Access Network: Engineered for durability and ease of installation, the GJYXFC drop cable combines a robust strength member with a flexible, safe design, making it the ideal solution for bridging the final meters to the home or building. The cable features a central optical fiber unit, two parallel strength members on either side, and an additional stranded steel wire for. The GJYXCH self-supporting butterfly lead-in cable is tested outside the GJXH cable with an additional reinforcement element The GJYXCH self-supporting butterfly lead-in cable is tested outside the GJXH cable with an additional reinforcement element 1. FTTH outdoor drop cable (GJYXFCH/GJYXCH) is also called self-supporting butterfly drop optical cable which consists.
