

# Category 6 cable management rack

## Overview

This guide covers the technical requirements for modern rack deployments: Cat6A cabling for multi-gigabit infrastructure, thermal dissipation for high-power PoE devices, proper rack depth planning, and SFP+/DAC uplink configurations. The complete Network Cable Organizer system revolutionises structured cabling in all network racks from a depth of 800 mm. Surplus cable lengths – whether CAT 6 or fibre-optic – are simply withdrawn with a spring balancer. This is a new product which is currently not yet available from stock. Our innovative system enables 10x faster installation & maintenance and thanks to our Patchcatch it also allows up to 50% more space. Our patented and. Professional cable management guide for 2026 network racks. Modern network racks face new physical constraints: deeper switches, hotter PoE++ loads, and. Our solutions offer a fully integrated system of copper and fiber network cabling and components that are designed to exceed all applicable standards for performance and reliability. Each panel features a double hinged cover that opens for cable access during moves, adds, and changes. This product meets the material restrictions of Article 4 of the RoHS Directive (2011/65/EU), including Commission Delegated Directive. Category 6 Rack-Mount 110 Wiring Blocks are available in 96- and 192-pair configurations with or without connecting blocks.
