

Color of 5 wires in the distribution box

Overview

Red: Red wires are used as phase wires and they carry electrical current. This guide describes wiring color codes, international standards, and main rules to keep in mind to work smarter and safer. Using the correct wiring color codes is crucial for identifying line, neutral, and ground wires, which saves time, simplifies maintenance and troubleshooting, and ensures the safety of. Most European countries follow a wire color code established by the International Electro-technical Commission (IEC). This article is for reference only. Wiring Color Codes in Europe (IEC) for AC Supply Wiring Color Codes in Europe (IEC) for DC Supply Is this faq. Color codes are sets of symbols or colors used to represent various values or functions. For typical building AC circuits (commonly up to 600 volts nominal), the NEC specifies identification rules for grounded conductors (neutral), requirements.
