

# Construction Site Electrical Distribution Box Assembly Standards

## Overview

The IEC 61439 series of standards sets out the regulations for power distribution boards as well as assemblies for power distribution in public networks, construction sites, and for prefabricated busbar trunking and cabling systems. Done right, it ensures safety, compliance, and long-lasting performance. In this guide, we'll break down everything you need to know to install a distribution box correctly and confidently. The main objectives of the standard cover the safety of persons. This fact sheet explains how to apply the requirements shown in AS/NZS 3012:2019 Electrical installations – construction and demolition sites (AS/NZS 3012:2019), which is called up as a mandatory standard by section 163 of the Work Health and Safety Regulation 2025 (WHS Regulation). The standard. The guide lists the process of design, assembly and documentation of a low-voltage switchgear assembly in the order of the necessary steps and at the same time assigns to these steps the relevant sections from the standard IEC 61439 / EN 61439. The pre-wired versions can be used on construction. Fiberglass box, polyester enclosure, polyester cabinet, polyester box with internal door.
