

Data Center Patch Cords

Overview

Plenum (OFNP): Fire-resistant, safe for air ducts. LSZH (Low Smoke Zero Halogen): Emits little smoke/toxic gas when burned; common in Europe and high-safety areas. LC: Small, duplex, most common in modern DCs (fits QSFP transceivers via LC). As deployment requirements grow increasingly diverse, driven by innovations like AI and dense server architectures, custom copper patch cords have become indispensable in meeting specific needs. At ZION Communication, we design and manufacture a full range of fiber patch cords for: This guide will help you quickly understand the main types of. MPO Patch Cords are a high-performance plug-and-play solution that improves airflow and eases cable congestion in high-density network areas. LC Polarity Reversible Uniboot Patch Cords enhance deployment and maintenance efficiency, offering easy, tool-free polarity reversal in the field. They are also called fiber jumpers. Used to connect optical transceivers ↔ transceivers, switches ↔ patch panels, or cross-connect panels. Though small, it plays a key role in maintaining signal integrity and stable data transmission across LAN and data center environments. A patch cord is a precise assembly of.
