

Distribution Network Automation Hot Channel 1U

Overview

With up to 21 intelligent programmable breakers with a rating up to 125 amps, the SMART PDU I- type, with its 1U design, is compact, hot swappable, and built to meet safety standards. Grow your network, not your headaches. Delta's SMART PDU I-Type allows for up to 21 intelligent, programmable. The SMART PDU I-type is a 1U compact DC power distribution unit with up to 21 intelligent programmable breakers (125A max). It's hot-swappable and safety-compliant. The output and input connections are (8)5-15. These space efficient and power dense PDUs were co-designed by Vertiv and Lenovo and come in a variety of 1U designs available to meet. The chassis shares both a single software and EDFA/DCM/OEO (Transponder) business modules, available with an Optical Supervisory Channel (OSC), is a platform of low-power consumption that combines state-of-art electronics and superior optical performance which makes it possible to build or upgrade.
