

Distribution box should be positioned off the ground

Overview

Outdoor boxes need to be at least 3 feet above the ground. This keeps them safe from water and dirt. These heights follow rules like BS 7671 and IEC 60364-5-52. These standards make sure the box is easy to. According to the "Code for Acceptance of Construction Quality of Building Electrical Engineering" GB50303-2002, the vertical distance between the bottom surface of the fixed stainless steel enclosure ip67 and the ground should be greater than 1. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1. Check and fix the box often to prevent problems. - Distribution cabinets, stands, and boxes should be connected with galvanized bolts, and anti-loosening parts should be complete; if fire protection is required, the inlets and outlets of the cabinets, stands, and boxes should be fire-sealed tightly. 2 Wiring Requirements for Distribution.
