

Double-door concealed electrical distribution box

Overview

The Double Door IEC Electrical Box is an essential solution for housing electrical equipment and power distribution components in industrial, commercial, and outdoor settings. Built to IEC 60529 standards, it provides optimal protection against dust, water, and mechanical damage. The company is located in Qiligang Industrial Zone, Liushi, Yueqing, Zhejiang, China. The transportation of our factory location is very convenient, 20 minutes from the airport and 5 minutes from the expressway intersection. Nearby ports are Ningbo, Shanghai, and Yiwu port. As the professional manufacturer of metal boxes and cabinets with over 20 years of manufacturing experience in OEM and ODM, we are engaged in industrial metal material processing. Our company has a total investment of RMB 61 million, established in 2000, the industrial building covers an area of over 50,000 square meters. A double door distribution board, also known as a double door consumer unit or distribution box, is an electrical enclosure used to house the electrical wiring and protective devices for a building's electrical system. With thousands of standard and custom solutions, the brand transforms complex electrical challenges into safe, scalable systems built. Fully equipped DBs supplied with busbar, earth links, neutral links and interconnecting links. Unique feature of PAN assembly with adequate wiring space.
