

Effect of Optical Cable Traction Machine

Overview

A traction machine and traction mechanism technology, applied in the direction of optical fiber/cable installation, etc., can solve the problems of inability to guarantee traction force and reduce traction efficiency, and achieve the effect of improving universal. The invention discloses an optical cable tractor capable of preventing pressure and tensile loss and a traction method thereof, and relates to the technical field of optical cable tractors. They can lay up to 288-core optical cables in underground, overhead, or pipeline scenarios, with automatic pre-tension adjustment to prevent damage.
