

Fiber Optic Fusion Splicer B-19

Overview

FBT-19S Optical Fiber Fusion Splicer is small size optical fiber fusions splicer, mainly used for fusion and protection of common communications fibers. In Japan, we hold Fiber optic training where participants can systematically acquire knowledge and skills necessary for using fusion splicer, tools, and performing splicing work. Fusion splicer enable splicing of Fiber Optic Cable with low loss and high reliability. For fusion splicer, we offer two. Dual axis camera viewing systems, automatic arc calibration technology and now ruggedized splicers that provide resistance to impact, rain and dust round out the Fujikura line—all of which make Fujikura splicers the world leader in splicing technology. The new rugged construction adds improved reliability by resisting shock, dust, and rain, and withstands a 30" drop test. Tech Optics, in business. The 19S is the new standard cladding alignment fusion splicer (fixed V-Groove) covering varied splicing needs in those fields with a series of innovative features, such as automated wind protector / tube heaters, 9seconds splicing and 14 seconds tube heating, ruggedized body, improved carrying.
