

# Fiber Optic Hot Fusion Splice Panel

## Overview

Fusion splicers are essential for creating low-loss, high-performance fiber optic connections in telecom, FTTH, and data center applications. The fusion fiber splicer can estimate the loss of the fusion splice, reducing uncertainty compared to mechanical splicing or field polishing. With the. The fiber optic splice module (FOSM) shall house and protect fiber optic splices, guarantee proper fiber cable management and bend radius control, and allow for clear labeling and logical organization of the fiber optic splices. They are designed to provide a transition point between high-fiber count outside plant (OSP). NG4access<sup>®</sup> Cabled Modules available in all module sizes and fiber counts up to 864 fibers NG4access<sup>®</sup> Splice Tray Four sizes of interchangeable Propel fiber pass-through adapter packs provide the breadth of capabilities for virtually any configuration.
