

Fiber optic cable panel with socket

Overview

Engineered for seamless integration between indoor fiber optic cables and pigtails, this socket panel is compatible with SC, LC, and FC connectors. The 2 port fiber wall outlet box is used as termination point to interconnect incoming cable with optical network unit device in FTTH, FTTB applications. It is typically installed inside the subscriber's home or building, close to the central distribution point provided by the broadband service. Compact and flame-resistant 2 Ports Fiber Optic Socket Panel for FTTH applications. Easy to install with push-cover design and supports custom logo printing. Crafted with high-quality industrial anti-aging ABS plastic material, the FWT ensures durability and longevity in various environments. Engineered for reliability and ease of use, these indoor optical faceplates provide secure fiber management and seamless connectivity for residential and commercial broadband deployments.
