

Fiber optic distribution box Ic

Overview

The distribution box is used as a termination point for the feeder cable to connect with drop cable in FTTx communication network system. The fiber fixing, splitting, splicing and jumper can be done in this box, and meanwhile it provides solid protection and management for the FTTx. Fiber Distribution Box is made of high-strength steel, anti-UV, anti-aging ability. Both the lid and the adapter plate may be removed, making simple access for working in the box. High density fiber optic management system reduces needed space. Feature: 12 ports optical fiber distribution box is used for the fusion splicing, splitting, wiring transmission and other functions of the optical transmission terminal; It can effectively terminate, protect and manage the optical cable. You can find fiber splice boxes and. This compact fibre optic building distributor is perfectly suited for connecting buildings with fiber optics and for further sub-distribution.
