

Height of outdoor lighting distribution box foundation

Overview

Wall-mounted boxes should be 4. This height makes it easy to reach without bending or stretching. Ground-mounted boxes should be raised 2 to 4 inches to avoid. The proper installation of a distribution box involves placing it at the right height to ensure safety and convenience. When flused installed in the wall, the bottom is 1. ALL DIMENSIONS ARE CONSIDERED FROM FINISHED FLOOR AND, UNLESS NOTED OTHERWISE, SHALL NOT VARY. ALL DIMENSIONS SHALL BE COORDINATED WITH ARCHITECTURAL DETAILS AND MAY BE ADJUSTED TO CONFORM WITH ARCHITECTURAL REQUIREMENTS AS LONG AS NO CODE. This specification covers technical requirements of design, manufacture, testing at manufacturer's works, packing, forwarding, supply and unloading at store/site and performance of pillar box with all accessories for trouble free and efficient operation. This outdoor pillar box will be utilised for. A light pole foundation is a reinforced concrete support structure that keeps a lighting pole stable by transferring the pole's vertical load, wind load, overturning moment, and lateral force into the ground.
