

High-efficiency UPS system 200kWh for vehicle-mounted fiber optic cables

Overview

A highly efficient double conversion UPS with robust design, achieving up to 95% efficiency in VFI mode and up to 98% in ECO mode, leveraging IGBT technology to eliminate system oversizing costs and ensure a low total cost of ownership (TCO). The brand-new Ultron HPH series 160-200kVA is a true online double-conversion UPS offering the best-in-class combination of power performance and efficiency for medium data centers, pan-IT, and other mission critical applications. Thanks to Delta's R&D expertise and excellent engineering. "Easy-to-install, easy-to-connect, easy-to-use, and easy-to-service 200 kVA 3 phase UPS with advanced product features, robust electrical specifications and compact design making your business continuity easy. " "Ideal for small and medium data centers and other business critical applications, this. 65 kA Icc with backfeed breaker kit (GVLOPT004) installed in the UPS Refer to the physical short circuit rating label on the UPS for the exact short circuit rating options of the specific UPS. <3% at 100% load THDI values are measured at the input busbars/terminals of the single UPS. Programmable:.. The Eaton® 93PM UPS combines efficiency and reliability with an eye-catching design. A space-saving, scalable and flexible device that's as easy to deploy as it is to manage, it's the perfect three-phase white or grey space solution for today's data center. Conserve valuable data center floor space. Designed to drive the future with innovation, Keor MP is a 3-phase online double conversion monolithic UPS with a module-based architecture. Increase your availability, reliability, and sustainability while expanding.
