They're perfect for secure environments like locked server rooms where you need easy access and maximum airflow. Consequently, many IT professionals prefer open-frame racks for testing labs and development environments. The mounting width ensures that most IT equipment remains safe. Rack height is measured in rack units (U) — 1U = 1. Most IT environments default to 42U, 19-inch width, and 1000–1200 mm depth unless space constraints or special equipment dictate.
