

# How to Choose a Router Fiber Optic Module

## Overview

Discover how to choose the right SFP module for your fiber optic network in 5 key steps: compatibility, environment, fiber type, wavelength, and data rate. A fiber optic SFP module is a compact, hot pluggable optical module used to connect network devices such as switches, routers, and servers through optical fiber. It allows network administrators to adapt hardware to different media types and. There are currently many models of SFP+ optical modules on the market, such as SFP-10G-SR optical modules for multi-mode transmission, SFP-10G-LR optical modules for single-mode transmission, and SFP-10G-LR optical modules that can be used for both single-mode transmission and SFP-10G-LRM optical. An SFP (Small Form-factor Pluggable) module is a hot-swappable transceiver used in switches, routers, servers, and telecom equipment to transmit data over fiber or copper connections.
