

Huawei 10G Gigabit Optical Module 10G Single Mode Single Core

Overview

The Huawei Optical Transceiver SFP-10G-LR is a versatile and high-performance 10G SFP+ module. Designed for single-mode fiber, it offers reliable 10km transmission at 1310nm. If the SFP-10G-ER-1310 is connected to a 10Gbase-ER standard optical module (1550nm, 10GE, 40km), the maximum transmission distance is only 20km due to different specifications such as wavelength and receiving sensitivity. Single-fiber bidirectional (BIDI) optical modules must be used in pairs. This product is highly beneficial for data centers and enterprise networks needing robust and long-range connectivity. 02310QBJ - Genuine Huawei SFP-10G-BXU1 10GBase, BIDI Optical Transceiver, SFP+, 10G, Single-mode Module (TX1270nm/RX1330nm, 10km, LC) Basic Information Transmitter Optical Characteristics Receiver Optical Characteristics This 02310QBJ is 100% genuine Huawei product. 2 dB, with in most cases is enough to reach about 10 km distance.
