

Huawei 24-port access switch 6

Overview

CloudEngine S5736-S Series Switches are standard multi-GE access switches for the Wi-Fi 6 era, featuring 24 downlink ports, four 10 GE SFP+ uplink ports, and one extended slot. Powered by Huawei's unified Versatile Routing Platform (VRP), the switches offer a range of capabilities, including High-power PoE, multigigabit speed, and AI-driven operations for smart campuses, IoT corridors, and Wi-Fi 6/6E/7 edge networks. Huawei's CloudEngine campus family pushes Power over Ethernet to the limit: from 15 W PoE and 30 W PoE+ all the way to 60 W PoE++ (IEEE 802.3bt Type 3) and 90 W. A Huawei 24-port PoE switch is a powerful networking solution designed to deliver both data and electrical power over a single Ethernet cable to connected devices such as IP cameras, wireless access points, VoIP phones, and other networked equipment. The CloudEngine S5731-S supports simplified operations and maintenance (O&M), intelligent stack (iStack), flexible Ethernet networking. Buy Huawei 24GE data ports and 4 SFP+ uplinks.
