

Huawei core switch port cannot be configured with IP address

Overview

Start by connecting your Huawei switch to a console port using a serial cable or via SSH if remote access is already enabled. Once in the CLI, enter `system-view` to enter. This document describes how to check the switch interface or port status and how to locate an interface physically down fault and restore the interface to the up state. Major causes of the interface physically down event include hardware and software failures. Issue 01 (2019-06-28) Copyright © Huawei Technologies Co. ARP provides some extended functions, such as proxy ARP, gratuitous ARP, ARP security, and ARP-Ping. RARP RARP maps a MAC address to an IP address. [com/enterprise/en/doc/EDOC1000047411/82a7746e/logging-in-to-a-device-for-the-first-time?](https://www.huaweicloud.com/enterprise/en/doc/EDOC1000047411/82a7746e/logging-in-to-a-device-for-the-first-time?idPath=24030814|259023469|259023623|259590359)

[idPath=24030814|259023469|259023623|259590359](https://www.huaweicloud.com/enterprise/en/doc/EDOC1000047411/82a7746e/logging-in-to-a-device-for-the-first-time?idPath=24030814|259023469|259023623|259590359) Give this a look as well. Configuring a Huawei switch to assign an IP address to VLAN 1 and binding multiple ports to it can seem challenging, but this step-by-step guide simplifies the process.
