

Lebanon connects to international fiber optic cable

Overview

BEIRUT: Prime Minister Saad Hariri announced Tuesday the initiation of a wide scale fiber optic project across all Lebanese territories, after state-owned telecom company Ogero awarded tenders to three international companies tasked with linking end users to their central offices. The project, launched in 2018, was. Fiber to the x (FTTX) is a generic term for any broadband network architecture using optical fiber to provide all or part of the local loop used for last mile telecommunications. This milestone will grant FTTH access to major cities, a real leap toward Lebanon's digital future. A new undersea cable linking Cyprus and Lebanon is being planned by Cyta, in a project expected to boost internet speed, emergency response, and economic growth across the region. The aim is to turn Lebanon into a regional hub for Internet distribution - Lebanon The Ministry of Telecommunications (MoT) has plans for a new Internet submarine cable to link the country to Europe, said Minister of Telecommunications Mohamad.
