

Method for fixing optical cables inside the box

Overview

Thus, a fiber termination box is used to terminate the optical fiber cables in the field and connect them to the pigtail by splicing. Then, the optical cable core and pigtail are. The optical cable terminal box is divided into: engineering plastic ABS material and high-quality cold-rolled steel plate; the inlet port has a plastic protective ring to reduce the friction between the optical cable and the shell and play a protective role. The outlet port is made of plastic. To establish easy and safe installation put the box where it will be installed and measure the required length of the cable. These. This manual is formulated in accordance with IEEE 1138 - 2008 and IEEE 524 - 1992, etc. OPGW has dual functions of aerial ground wire and fiber communication. Cable laying needs to be preceded and followed by specific steps to have successful installation.
