

Mobile communication fiber optic cables were cut

Overview

Multiple subsea fiber optic cables in the Red Sea suffered simultaneous cuts on September 6, 2025, disrupting global internet and communications traffic. The incident began at 05:45 UTC and has forced operators to reroute traffic between Asia, the Middle East, and Europe over. On orders from the ruling Taliban, Afghanistan's telecommunications authorities have capped fiber optic internet access. It is unclear how long telephone and cellular networks will be affected, or to what degree. (Courtesy photo, composite image by The Desk) Charter Communications says a network outage that disrupted telecom services for thousands of Southern California residents in mid-June was the. Law enforcement agencies pushed back Tuesday on an internet service company's characterization of damage to some of its fiber optic lines in the San Fernando Valley as an act of "domestic terrorism."
