

Monaco AOC Active Optical Cable 200G

Overview

200G AOC cables deliver high density and speed, supporting next-generation Ethernet applications. With high-speed, high-reliability transmission, FS twinax cables come in different lengths to support different transmission data rates, such as 1G, 10G. From the outset, the term Active Optical Cable refers to fiber-optical cables in which the optical conversion & signal conditioning are built into the cable ends. In contrast, passive cables do not have such electronics. When you see “200G AOC,” it is a version of Active Optical Cable that supports. JTOPTICS® Active Optical Cable (AOC) cable assemblies are designed to meet data center, networking and high-performance computing application needs for a high-density cabling interconnect system. These AOC assemblies are QSFP DD MSA compliant, also backwards port compatible with. For data-intensive applications, speed, reliability, and cost-effectiveness are critical.
