

Monitoring and Control 144-core ODF Rack Fiber Optic Distribution Box

Overview

Handles 144 fiber cores via 12 modular trays (12 fibers per tray), enabling scalable and organized fiber management in compact spaces. It acts as a distribution point for fiber-optic cables in a central office, data center, or other communication. Fiber Management Tray also called ODF Distribution Box, Integrated Splicing and Distribution ODF. It is mainly used for cable inlet, grounding and fixing and the splicing between the terminal end and pigtail. Welding. FBWN-ODF-144-A 144 cores 4U ODF fiber optic are the backbone of your fiber optic network system. A Fiber Optic Patch Panels includes up to 12 duplex SC connectors, as well as an integrated IDC shroud with strain reliefs that are. ODF unit box is a high-density, high-capacity design product, with good looks generous, reasonable distribution, easy to find, easy management, easy installation and good operational ect. The frame design is based on a 4U rack unit height.
