

New type of power distribution box body model and specifications

Overview

Compact box-type structure reduces on-site installation time by 40% compared to traditional substations. Supports incremental capacity expansion from 0. Integrated smart monitoring system (SCADA-compatible) ensures real-time fault detection and load. Here, decentralized electrical installation has proven its worth: Our distribution boxes offer the necessary installation space for pluggable installation - for the most diverse applications in the most diverse areas of use: Our distribution box can be used wherever high demands and harsh. The main distribution board is designed to fulfill electrical and mechanic requirements with modular configurations according to the latest international standards and IEC 61439-2. With modular. There are many specifications and models of Distribution box. It ensures reliable power distribution by directing electricity to individual circuits and. As one of the world's leading providers, INDU-ELECTRIC manufactures customized Power Distribution Solutions for every application.
