

Optical Module 886

Overview

Compact gateway between KNX TP and Modbus RTU with 250 freely configurable channels. Modular device for DIN-EN 60715 TH35 rail mounting. 1 module = 18 mm wide, 58 mm deep. Integrated circuits and reference designs help you create a smaller and faster optical module design used in high-bandwidth data communication applications. Its primary function is to achieve optoelectronic conversion by converting electrical signals into optical signals and vice versa. The parts of pigtailed PD module - single-mode fiber, lens and photodiode - are actively aligned by high power YAG laser welding method. There. Formerica Optoelectronics Inc. Welcome to contact us via email: inquiry@FormericaOE. Optical modules typically have an electrical interface on the side that connects to the inside of the system and an optical interface on the side that connects to the outside.
