

Optical Power Meter USB Port

Overview

A USB Optical Power Meter is a newly designed device that may get in touch directly to a computer via a USB port. Which makes it portable and easy to maneuver available for fieldwork. Thorlabs has integrated some of our most popular sensor head formats with a compact USB power meter interface that can be operated using a computer running the Optical Parameter Monitor (OPM) software (see the Software tab for download information). Sensor head options include our standard. The 843-R-USB has the same performance as the 843-R, with the addition of USB communication to a PC. Install PMManager to use with the 843-R-USB, and your PC becomes a full optical power meter workstation. A COM object for system integrators, as well as a LabVIEW library are provided. Absolute power and insertion loss (IL) are accurately measured with this USB power meter when used in conjunction with the corresponding. StarViewer turns your Android or iOS based smartphone into a portable Ophir laser power / energy measurement monitor. The iOS version of StarViewer works with Ariel sensor.

USB Handheld Optical Power Meter | sisco

Controlled by a microprocessor, the USB handheld optical power meter offers a power measurement range of -70 to 3 dBm and a wavelength range of 800 to

PM-212 Pocket optical power meter USB probe | OPTOKON

The PM 212 optical power meter is a small, pocket size low cost item. The small size does not prevent the optical meter fulfilling all technical requirements for field equipment. The tester can be used as

SOPM306 Series USB & Optical RF Power Meters

The new series of USB & Fibre Optic power meters offer an extended measuring bandwidth up to 6 GHz, with two different models which can be operated on a fiber optic link and battery power, or as

Handheld High Precision Fiber Optic Power Meters

Optical Power Meters (OPMs) are indispensable tools for Fiber Technicians and Field Installers as well as for fiber engineers assessing the available fiber plant. The Power Meters can be used to measure

Optical Power Meter: A Tool for Measuring Fiber Optic Power

An optical power meter is a device used to measure the power of an optical signal. It is a valuable tool for fiber optic technicians, as it can be used to measure the power of a variety of fiber optic devices,

PM-212 Pocket optical power meter USB probe | OPTOKON

PM-212 Pocket optical power meter USB probe The PM 212 optical power meter is a small, pocket size low cost item. The small size does not prevent the optical meter fulfilling all technical requirements

Multiport Power Meters

N7743C Optical high-power power meter with 2 / 4 ports, analog outputs for linear or logarithmic feedback, and option to extend the wavelength range down to 800 nm.

EO USB Power/Energy Meter

The USB Laser Power Meter is also for use with thermopile and optical detectors and can be connected directly to a PC using the including software and the port

Juno USB Virtual Laser Power & Energy Meter

Allowing connectivity of Ophir's smart (DB-15) power and energy sensors to computers (PC, laptops and others) using USB connectivity. It allows remote

PM-212-MTP-GE Multifiber optical power meter

PM-212-MTP-GE Multifiber optical power meter Easy measurement of multifiber connectors MTP/MPO input connector: 12/24 or 16/32 fibers Two functions: -

Optical Communication

OPTICAL PROBE This optical probe is used for local communication with electrical energy meters. It's compliant with the IEC 62056-21 (in the past IEC1107). The
