

Pre-formed butterfly optical cable

Overview

FTTH Butterfly Optic Cables, also known as flat drop fiber cables, feature a compact flat profile with optical fibers placed at the center and reinforced by parallel strength members on both sides. The outer sheath is typically LSZH or PVC, optimized for indoor and outdoor. The invention relates to the field of optical cable production, in particular to a butterfly-shaped optical cable production device which comprises a pay-off mechanism, an extrusion mechanism, a cooling and drying mechanism and a traction device which are sequentially arranged, wherein the FTTH Butterfly Optic Cables are specifically designed to meet the growing demand for high-speed fiber-to-the-home deployments. is a coaxial cable manufacturer that integrates research and development, production, and sales, including low loss RF coaxial cables, butterfly optical cables, wireless communication RF cables, and other products. Fiber optic cables, with their ability to transmit vast amounts of information over long distances with minimal signal loss, have become the preferred choice for a wide range of applications. 5 billion in 2023, projections indicate a compound annual growth rate (CAGR) of 12.
