

Saudi Arabia offers 100G AI server

Overview

Saudi manufacturer Alfanar is making Hewlett-Packard servers in its Riyadh factory for distribution in the kingdom, the wider GCC, Egypt and Jordan. Hewlett Packard's regional MD Mohammad Alrehaili calls the development “a very important milestone” in Saudi Arabia's AI ambitions. But it is not all. Through Humain—a Public Investment Fund entity launched just six months prior—the kingdom formalized partnerships placing up to 150,000 AI accelerators in a new "AI Zone," secured xAI's commitment to deploy Grok nationwide in a first-of-its-kind country-scale rollout, and locked Adobe as its. The Saudi Arabia AI Server Market is expanding rapidly as enterprises and research institutions deploy AI-optimized infrastructure to handle growing workloads. AI servers in Saudi Arabia are specifically designed with high-performance GPUs, TPUs, and specialized processors to accelerate deep. HPE's latest 'Saudi Made' ProLiant servers, powered by AMD EPYC processors, mark a new phase in local manufacturing—enhancing performance, data resilience, and the Kingdom's AI ambitions. Saudi Arabia's technology ambitions are no longer about simply adopting innovation — they're about building it. Explore ServerBasket's portfolio of Dell PowerEdge AI servers built with leading Intel 4th Gen and AMD EPYC high-core CPUs, DDR5 RAM, and NVMe SSD storage.
