

Stainless steel cable tray with perforated cable routing

Overview

Precision perforations (custom hole sizes available) provide outstanding water/dust drainage and cable cooling. Meets IEC 61537 and CE load ratings while being 35% lighter than carbon steel — ideal for elevated or seismic installations. Clear cable routing - Organized and safe cable management, easy maintenance, helps prevent failures. Fast installation - Reduce installation costs with quick and efficient. Precision punched and formed on our 10 automated lines inside a 50,000² Shandong factory using premium 304/316L stainless steel. With 100,000 tons annual capacity and 20+ years export experience, this series delivers permanent corrosion protection and superior drainage — standard sizes ship in 5. Installed in a wide range of applications, our perforated cable tray systems is available is 4 variants, covering 3 wall profile heights. Manufactured from high-quality GI, Hot Dip Galvanized, Powder Coated, and Stainless Steel materials. Available in mul ating ensures durability in harsh environments. Standard lengths available in 2500mm & 3Stainless steel cable trays are made of 304, 316 grade stainless steel, which are designed into channel style, ladder style, perforated style. Perforated Cable Tray Made of Sheets With Perforation on the based or side 2. Length: 1 Mtr to 6 Mtr (6000MM) 4.
