

Swedish Access Switch 800G

Overview

Designed specifically to enhance data center networks, the SSE-T8164 offers 64 ports at 800 gigabits per second. The Edgecore AIS800-320 is a high-performance, low latency switch for high-performance data centers. Breakout options include 2 x 400G, 4 x 200G, and 8 x 100G per port, with a maximum of 160 logical ports. Offers reduced. DS6000 is a 64-port 1.6TbE switch in a 3U form factor targeted for 19-inch racks that provides 102.4Tbps bandwidth, purpose-built to support AI backend networks for scale-up and scale-out networking. Artificial-Intelligence and Machine-Learning (AI/ML) applications are being used increasingly in today's data centers, and Cisco N9000 Series Switches have the hardware and software capabilities to provide the right latency. 7050X Series The 7050X Series combine scalable L2 and L3 features with comprehensive network monitoring, automation, virtualization and visibility features for Enterprise and virtualized Data Center networks. For the most demanding environments, the 800G routing and switching platforms provide. Traditional 400G Ethernet is increasingly inadequate for handling massive workloads efficiently.
