

Zinc-plated copper busbar for network cabinet grounding

Overview

The rack bonding busbar provides a convenient ground path between equipment mounted in a rack and the telecommunications bonding backbone. Cabinets, racks, and other enclosures in computer rooms shall not be bonded serially; each shall have their own dedicated bonding conductor to the bonding network. Route electricity within switchboards and battery banks; also known as bus bars Create a convenient central grounding point by connecting multiple ground wires In cabinets and other tight spaces, ground multiple wires at one convenient spot Our most conductive metal for electrical applications—all. Simplify your panel wiring and ensure electrical safety with our universal ground bar, accommodating various wire sizes and offering flexible mounting options for any control panel or enclosure. Suitable for residential and commercial electrical installations. Includes a welded steel rod pigtail. Category: Ground Plates Bus Bar, Length: 2 Inch x 12 Inch x 1/4 Inch, Material: Copper, Application: For Tele-Communications Grounding Applications Category: Bus Bars Grounding Bus Bar, Pattern: CC.
